

Ireland Talent Shortages Over Time

We are seeing unprecedented times for Talent Shortage numbers, with a record 79% of employers having difficulty in filling jobs due to lack of skilled talent. Comparing to 2010, this is an increase of 71 percentage points.

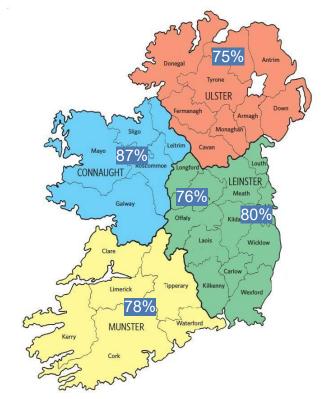

Large Sized Companies in Ireland Report Most Difficulty Hiring

In particular, large and small sized firms are having the most difficulty in hiring talent at 85% and 83% respectively. However, evidently businesses across the board are struggling with medium and micro sized companies also reporting difficulties.

Talent Shortage by Region in Ireland

Connacht as a region is experiencing the most acute talent shortage at 87%, followed by Dublin at 80%. This shows the huge demand for staff in the western counties all competing for staff in a relatively small talent pool.

As we emerge from the pandemic, this is our collective opportunity to act with urgency, to scale bold, disruptive ideas and collaborations across business, government and education. And now is the time to reshape a better, brighter future for workers – one that is more skilled, more diverse, and more wellbeing-orientated than we could ever have imagined.

About the ManpowerGroup Employment Outlook Survey

EXPLORE THE DATA

The ManpowerGroup Employment Outlook Survey is the most comprehensive, forward-looking employment survey of its kind, used globally as a key economic indicator. The Net Employment Outlook is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting a decrease in hiring activity. Running since 1962, various factors underpin the success of the Survey:

Unique

It is unparalleled in its size, scope, longevity and area of focus. The ManpowerGroup Employment Outlook Survey is the most extensive, forwardlooking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Independent

The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup's customer base.

Robust

The survey is based on interviews with more than 40,000 public and private employers across 40 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information

Focused

For more than six decades the survey has derived all of its information from a single question: "How do you anticipate total employment at your location to change in the three months to the end of September 2022 as compared to the current quarter?"

Survey Methodology

The methodology used to collect the data for the Employment Outlook has been digitised in 40 markets for the Q3 2022 report. Respondents in prior quarters were contacted via telephone. With the shift to remote working and much higher reliance on the internet, responses are now being collected online

Respondents are members of double opt in online panels and are incentivised to complete the survey. The question asked and the respondent profile remains unchanged. Size of organisation and sector are standardised across all countries to allow international comparisons.
